Street and alley improvement were the focus of the February 19 Minden City Council meeting. A public hearing for the One and Six Year Plan was opened. Jeff Palick from Olsson Associates provided an overview of the street projects included in the plan. One Year projects includes the 2019 Street Paving Project that has been bid out with work to begin this Spring. Streets included in that project are sections of Campbell, 8th Street, and Holland. Three new projects were added to the One Year plan including improvements on the square, one block of 10th Street, and the alley between 10th and 11th Streets. Improvements on the square have been bid out as part of the Downtown Revitalization project. The other two projects were added as part of a future development.
